# **Environmental Performance**

#### **Environmental-Related Data**

This page outlines the environmental activities of each of Hino Motors production plants as well as data based on environment-related laws and regulations.

- ➤ Headquarters/Plants in Japan
- Other Bases in Japan
- Overseas

### **Headquarters and Hino Plant**

#### Headquarters and Hino Plant Overview

Address	1-1, Hinodai 3-chome, Hino-shi, Tokyo
Major products	Heavy-duty trucks (Hino Profia) Medium-duty trucks (Hino Ranger)
Employees	5,900
Site area	447,081 m <sup>2</sup>
Total floor space	403,242 m <sup>2</sup>

Acquisition of ISO 14001 certification: March 24, 2001

#### **Environmental Policies**

- 1. Harmonious coexistence with society and the environment
- 2. Continuous improvements and prevention of environmental pollution
- 3. Compliance with laws and regulations
- 4. Mottainai mindset is the basis for all activities
- 5. Enhancement of individual environmental awareness

#### Through Each Plant Hino Motors Strives to Manufacture Quality Vehicles and Support Transportation that is Friendly to the Earth and People

At our Headquarters & Hino Plant, we are actively establishing varied and diverse targets that set the direction for our environmental initiatives. In diligently working to achieve these goals, Hino Motors is endeavoring to minimize the environmental load created by both production and distribution processes. Based on these activities, we recognize that continuing efforts to supply products with leading environmental performance to society lie at the heart of our corporate social responsibility. As a result, we constantly review and work to lower the environmental load of every function of our business from development to purchasing, production, preparation, and office management. In this manner, our ultimate goal is to harmoniously coexist with the global environment. Furthermore, in addition to the mottainal mindset held by each employee, which in Japanese conveys an attitude of preventing waste, we make efforts to eliminate muda, mura, and muri (unprofitable, unsteady and unreasonable, respectively) in our energy-saving and resource-saving activities while at the same time engaging in activities aimed at protecting the natural environment.

Located in close proximity to a residential area, Hino Plant makes every effort not to disturb or comprise the lives of its neighbors. As a result, we strictly adhere to measures that minimize noise, vibration, and odor. Looking ahead, we will continue to manufacture quality vehicles and support transportation that is friendly to the earth and people.

### Award Record

FY2003	Winner of the Highest Award presented by the Chairperson of the Electric Safety Kanto Committee
FY2005	Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization
	Committee
FY2006	Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee
E) (0007	<del></del>
FY2007	Winner of the Highest Award for Electric Safety and Electricity Usage Rationalization Committee
FY2008	Winner of the Highest Award for Electric Safety and Electricity Usage Rationalization Committee

Applies to volumes handled equal to one ton or more (or 500 kg or more in the case of Specified Class I Designated Chemical Substances) Volume removed/disposed: Volume removed by incineration, decomposition or other treatment method

Volume consumed: Volume converted to other substances by chemical reaction or incorporated in or appended to products and removed from the premises

#### **Hamura Plant**

#### Plant Overview

Address	3-1-1 Midorigaoka, Hamura-shi, Tokyo
Major products	Light-duty trucks (Hino Dutro, Dyna, Toyoace, Land Cruiser Prado, and FJ Cruiser)
Employees	4,500
Site area	750,770 m <sup>2</sup>
Total floor space	377,901 m <sup>2</sup>

Acquisition of ISO 14001 certification: March 10, 1999

#### **Environmental Policies**

- 1. Compliance with laws and regulations
- 2. Preventive measures through continuous improvements and prevention of pollution
- 3. Promotion of energy saving, resource saving, and reduction of waste
- 4. Harmonious relations with local communities

We are aiming to produce light-duty commercial vehicles for the world as a mother factory trusted by the community

"Each of us can apply ideas as professionals and show the world Hamura's great potential" is our motto at the Hamura Plant. Under this motto, we are carrying out environmental conservation measures and improvement activities that consider the environment from various perspectives. As a production plant that strives to protect and preserve the environment, the Hamura Plant has set ambitious goals for all employees to pursue, and it is actively implementing measures for reducing greenhouse gases in order to fight against global warming.

Everyone takes part in these measures with an awareness of their responsibility to deal with environment-related changes and risks. Specifically, we follow three principles of action on the actual site, focusing on the actual things at hand and always recognizing the reality of the situation, while making sure that we never avoid environmental preservation activities that are difficult, challenging, or troublesome.

Recognizing that safety is the basis for all activities, the Hamura Plant is aiming to produce light-duty commercial vehicles for the world as a mother factory trusted by the community.

#### Award Record

February 2007 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2008 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2008 Winner of the Chairperson's Award presented by the Energy Conservation Center  February 2009 Winner of the Ministry of Economy, Trade and Industry Minister's Award for Excellence in Plant Energy Management  February 2010 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2011 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2012 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2013 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2014 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2015 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2016 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2017 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2017 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2017 Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee  February 2017 Winner of the Energy Management Achiever Award presented by the Kanto Bureau of Economy, Trade and Industry Director's Awards  February 2017 Hamura Plant awarded for energy conservation	February 2005	Winner of the Chairperson's Award presented by the High Pressure Gas Safety Institute of Japan Winner of the Director-General's Award presented by the Natural Resources and Energy Agency Winner of the Highest Award presented by the Kanto Region Electricity Usage Rationalization Committee

### **Nitta Plant**

#### Plant Overview

Address	10-1 Nittahayakawa-cho, Ota-shi, Gunma Prefecture
Major products	Medium- and light-duty truck engines, medium- and heavy-duty truck transmissions, and medium-duty truck axles
Employees	3,200
Site area	567,608 m <sup>2</sup>
Total floor space	402,990 m <sup>2</sup>

Acquisition of ISO 14001 certification: March 27, 2000

#### **Environmental Policies**

- 1. Harmony with the community and harmonious coexistence with the environment
- 2. Prevention of environmental pollution as the base for all operations
- 3. Compliance with laws and regulations
- 4. No waste and no wasteful use
- 5. Enhancement of each individual's environmental awareness

## Striving to Become a People-Friendly, Environment-Friendly, Clean Plant

At the Nitta Plant, located in a lush green setting, we have made the 3Ss (seiri, seiton and seisou, meaning well-organized, well-arranged and clean) as the basis for all plant activities. We are also promoting environmental conservation and improvement activities with a sustained awareness of environmental load based on the Nitta Plant Environment Policy.

By working to prevent environmental risks before they occur focusing particularly on upstream production activities, we are working to alleviate environmental

risk. As a further initiative for reducing load of the environment, all plant personnel are aiming at higher goals for the prevention of global warming. At the same time, we will make efforts to maintain a clean plant that is accepted by the local community as friendly to people and the environment.

#### Award Record

FY1999 Winner of the Director's Award in the Electric Lighting category presented by the Kanto Bureau of International Trade and Industry

FY2001 Winner of the Director's Award in the Heating category presented by the Kanto Bureau of Economy,

Trade and Industry

FY2002 Winner of the Director-General's Award (Electrical Division) presented by the Natural Resources and

**Energy Agency** 

FY2003 Winner of the Energy Conservation Activity Excellent Group Award presented by the Kanto Bureau of

Economy, Trade and Industry

FY2004 Winner of the Director-General's Award (Heat Division) presented by the Agency for Natural

Resources and Energy

## **Oume Parts Center**

The Center is responsible for truck and bus parts and components, and transports them nationwide.

Acquisition of ISO 14001 certification: January 11, 2002

## Center Overview

Address	1-5-1 Suehiro-cho, Ome-shi, Tokyo
Description of business	Management and transport of service parts
Employees	73
Site area	26,288 m <sup>2</sup>
Total floor space	31,533 m <sup>2</sup>

### **Environmental Policies**

- 1. Harmonious coexistence with the environment
- 2. Environment conservation by prevention of environmental pollution and sustained improvement
- 3. Compliance with laws and regulations
- 4. Energy saving and Waste saving
- 5. Enhancing each individual environmental awareness

### **Hidaka Delivery Center**

Hidaka Delivery Center manages and controls finished products (trucks) and delivery to body manufacturers and dealers nationwide.

Acquisition of ISO 14001 certification: January 11, 2002

#### The Americas

### Center Overview

Address	689-1 Kamikayama, Hidaka-shi, Saitama Prefecture
Description of business	Management and transport of products (trucks)
Employees	12
Site area	265,989 m <sup>2</sup>
Total floor space	10,118 m <sup>2</sup>
